Weekly Coal Production

Production for Week Ended:
February 11, 1989

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. This week's Supplement 1 includes monthly and annual U.S. level data on coal production, consumption, stocks, imports, and exports. Supplement 2 contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price); and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1987*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Summary

U.S. coal production in the week ended February 11, 1989, as estimated by the Energy Information Administration, totaled 18 million short tons, 4 percent higher

than production in the previous week. Coal production east of the Mississippi increased slightly and production west of the Mississippi was 10 percent higher.

Books like *The Space Shuttle at Work, Starting a Business, U.S. Postage Stamps, and National Parks Guide and Map*. I daresay there's even information on one of my favorite subjects—printing.
